

GAS EMERGENCY CONTACT DETAILS

If your site(s) consume over 25,000 therms (732,000 kWh) of gas per annum, as part of the network code, National Grid Company requires emergency contact details for said site(s). It is your responsibility to submit this information. If you fail to do so it may result in late confirmation of your site. This may then lead to non-registration or a price increase.

If the site(s) are not manned 24 hours we require three separate contact details, however if the site(s) is manned 24 hours, then one set of contact details is acceptable.

If you have provided this information upon signing your contract with us and would like to amend these details, please contact our Business Support Team on 020 7870 4940.
